CAREER OBJECTIVE

Aspiring Electrical and Electronics Engineer with 1 year of experience as Station Operator at a 110 kV substation, Sindagi, keen to join a dynamic organization, leverage my technical knowledge, learn from experienced peers, and contribute to innovative engineering projects. Committed to continuous learning.

EDUCATION

GOVERNMENT ENGINEERING COLLEGE TALAKAL KOPPAL

June 2026

Bachelor of Engineering, Electrical and Electronics Engineering

BLDEA's S S M POLYTECHNIC COLLEGE VIJAYAPUR

August 2023

DIPLOMA (Electrical and Electronics Engineering)

P D J, HIGH SCHOOL VIJAYAPUR

June 2019

SSLC

PROJECTS

MINI PROJECTS

• Automatic Headlight Dimmer System

Sep 2024 - Nov 2024

Designed and implemented an embedded system that automatically adjusts vehicle headlight intensity based on incoming Vehicle lights using sensors. Improved road safety by reducing glare for opposite-side drivers.

• Dual Power Generation System Using Solar and Wind

Feb 2025 - Jun 2025

Developed a hybrid energy system capable of generating power from both solar and wind sources. Integrated charge control and power management modules to optimize energy output and system efficiency.

MAJOR PROJECT

• Artificial Intelligence Based Fault detection in Transmission Lines

Feb 2025 – Present

Built an AI-based system to detect and classify transmission line faults in real time. Used sensor data, IoT (Node MCU) to identify fault conditions and send alerts through cloud platforms like Thing Speak to monitor the real time fault detected status in transmissions lines. Enhanced reliability and early fault detection in power systems.

SKILLS

- Python Programming
- PCB Design
- MS Word
- Power Point
- HTML
- CSS
- Frontend Developer
- Data-base(SQL)
- AI-Agent

CERTIFICATIONS

- The Complete Python Developer — Simplilearn , Nxt wave
- Frontend Developer - Nxt wave
- PCB Design Course — Udemy
- AI Agents for Beginners – Simplilearn
